Task on CloudFront & Route 53

1. Configure VPC peering in cross regions.

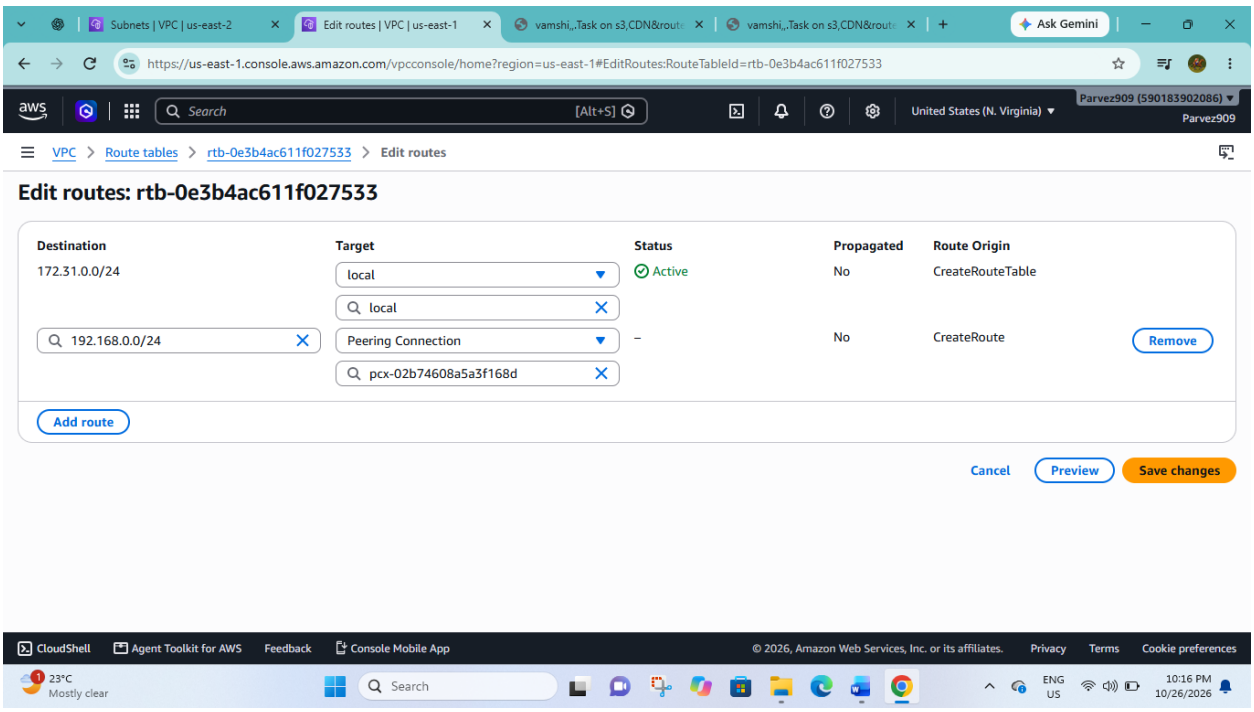

•

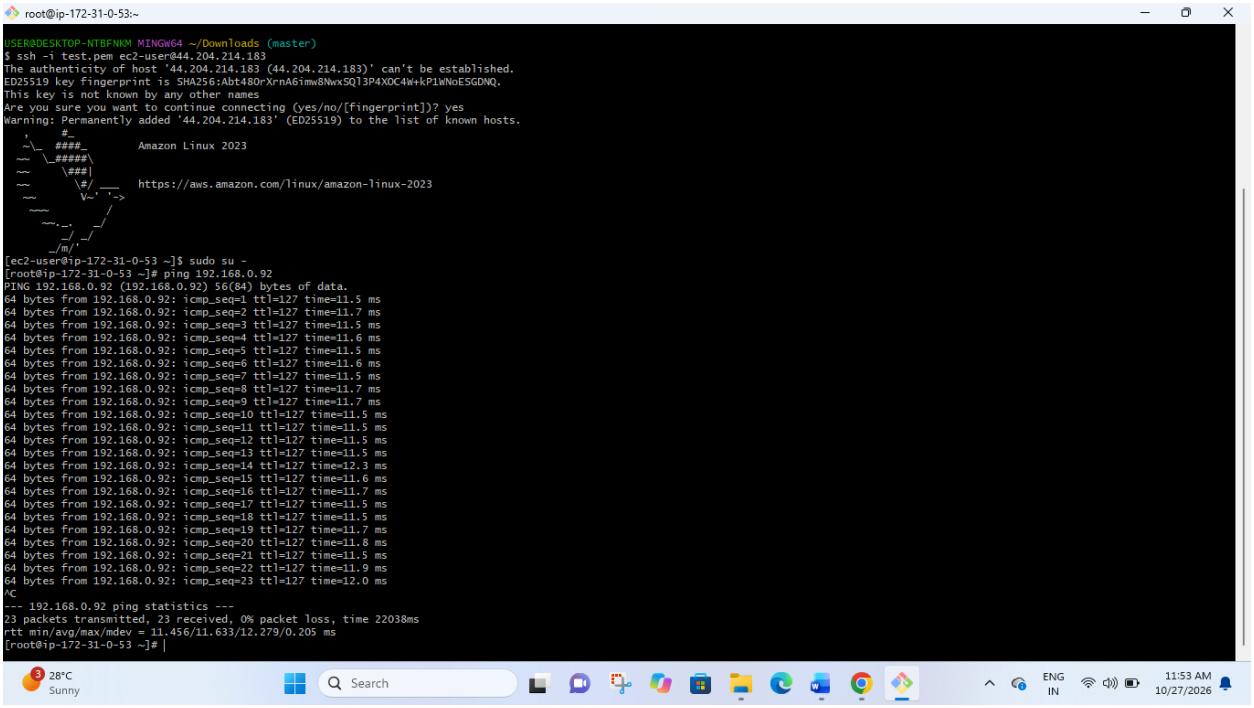

•

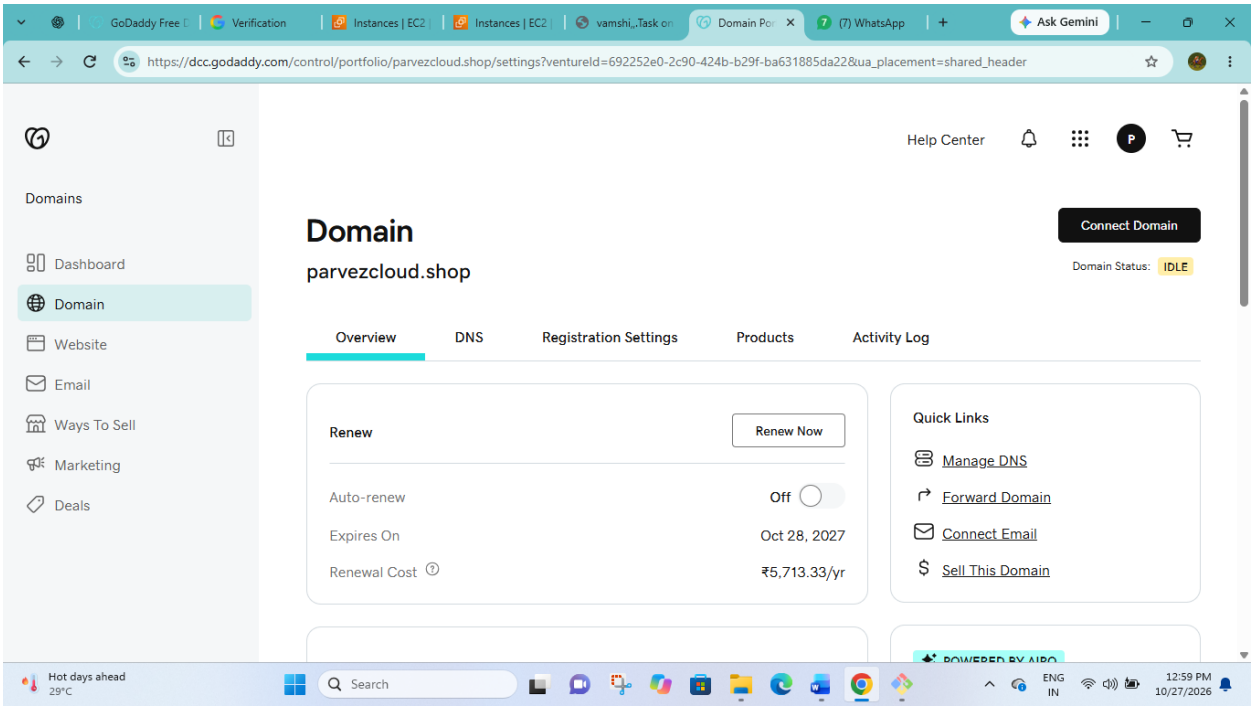

in this task I have created two vpc in different regions to connect each other and in n.virgina

I have create one internet gateway and attch to other ohio region to connect private ip address and also through vpc peering .

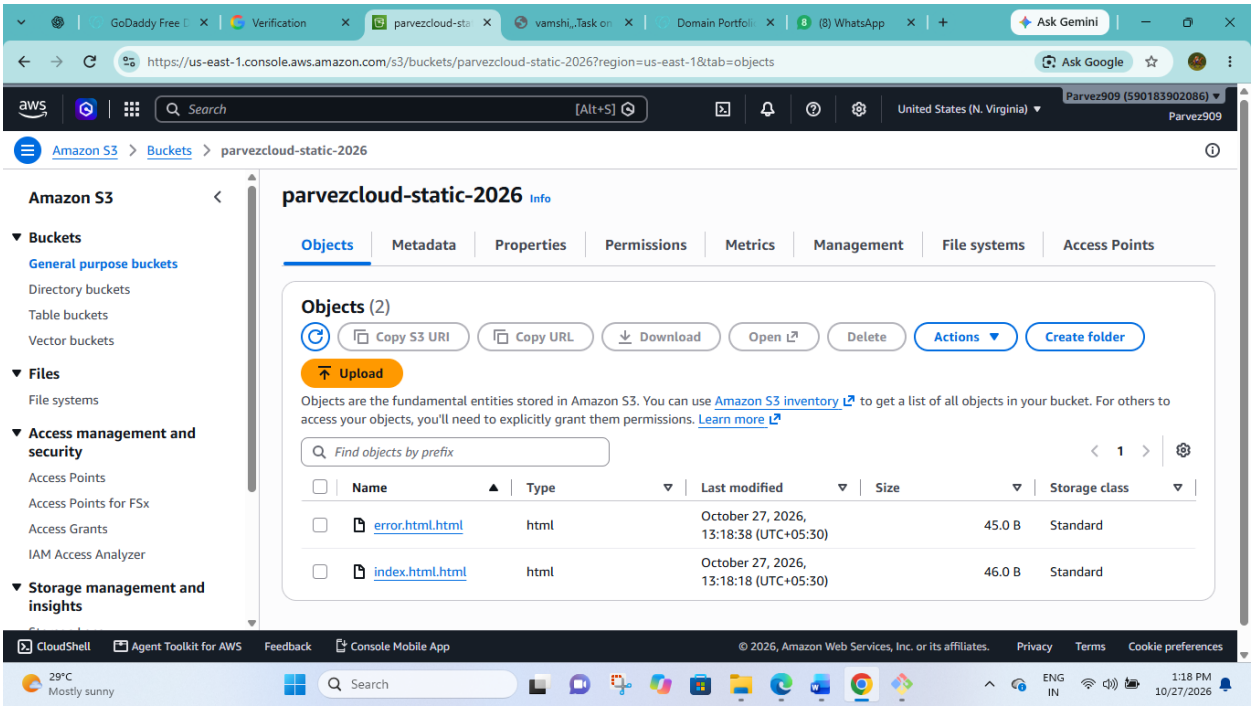

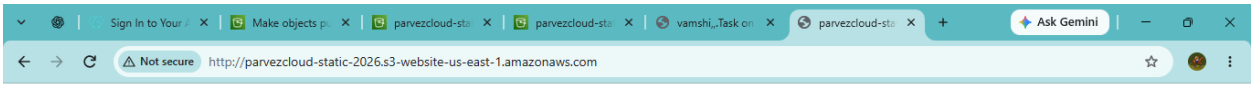

2. Purchase one domain from GoDaddy.

Objective: Purchase a domain that will be used to access the website through a custom domain name.

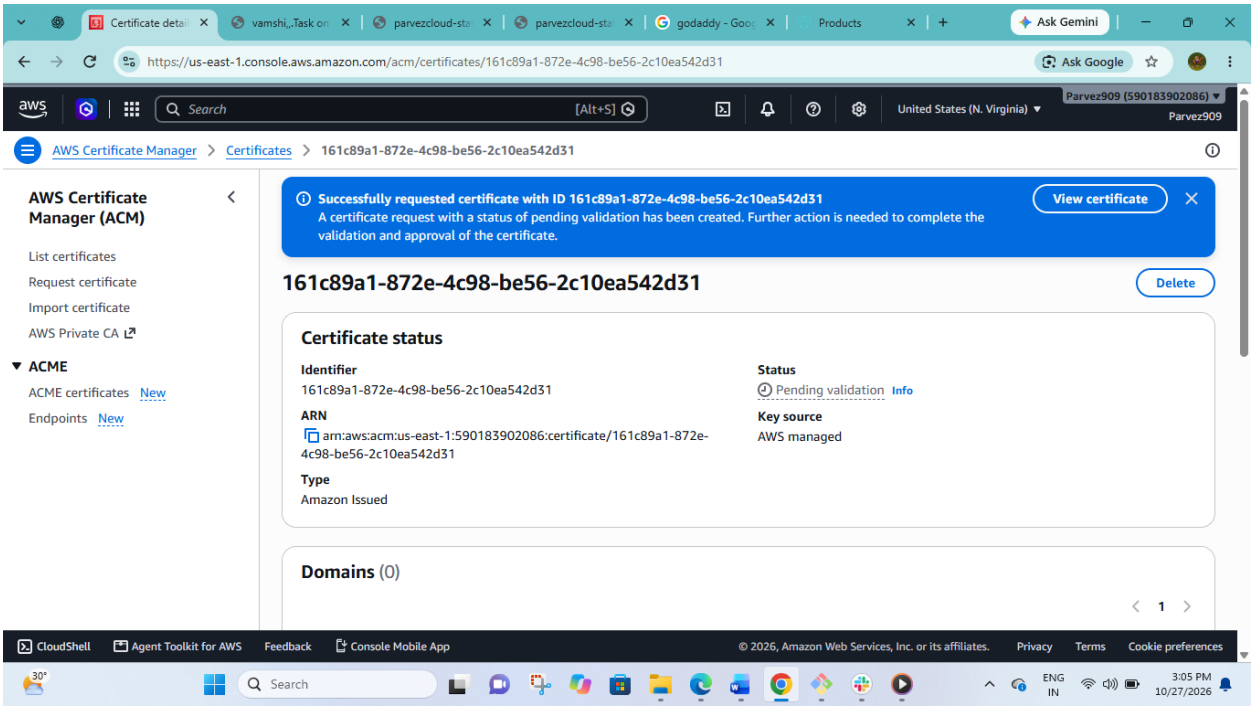

3. Deploy static website in S3.

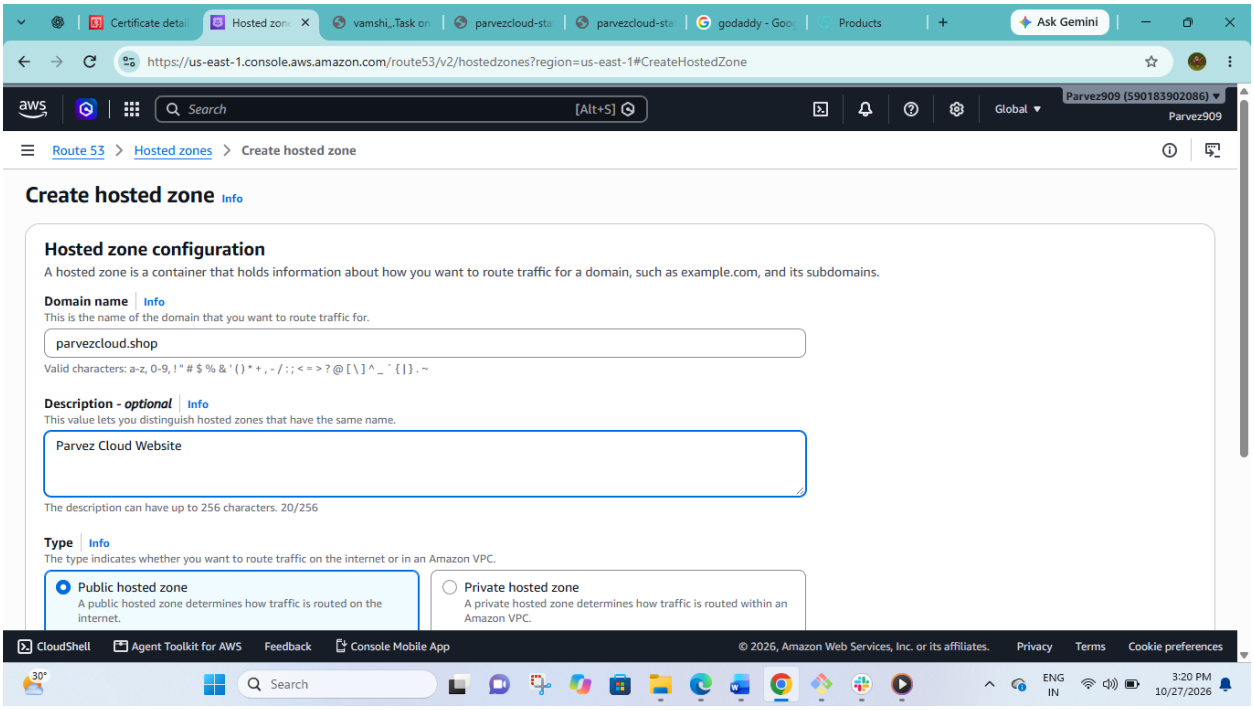

this statick website is working.....

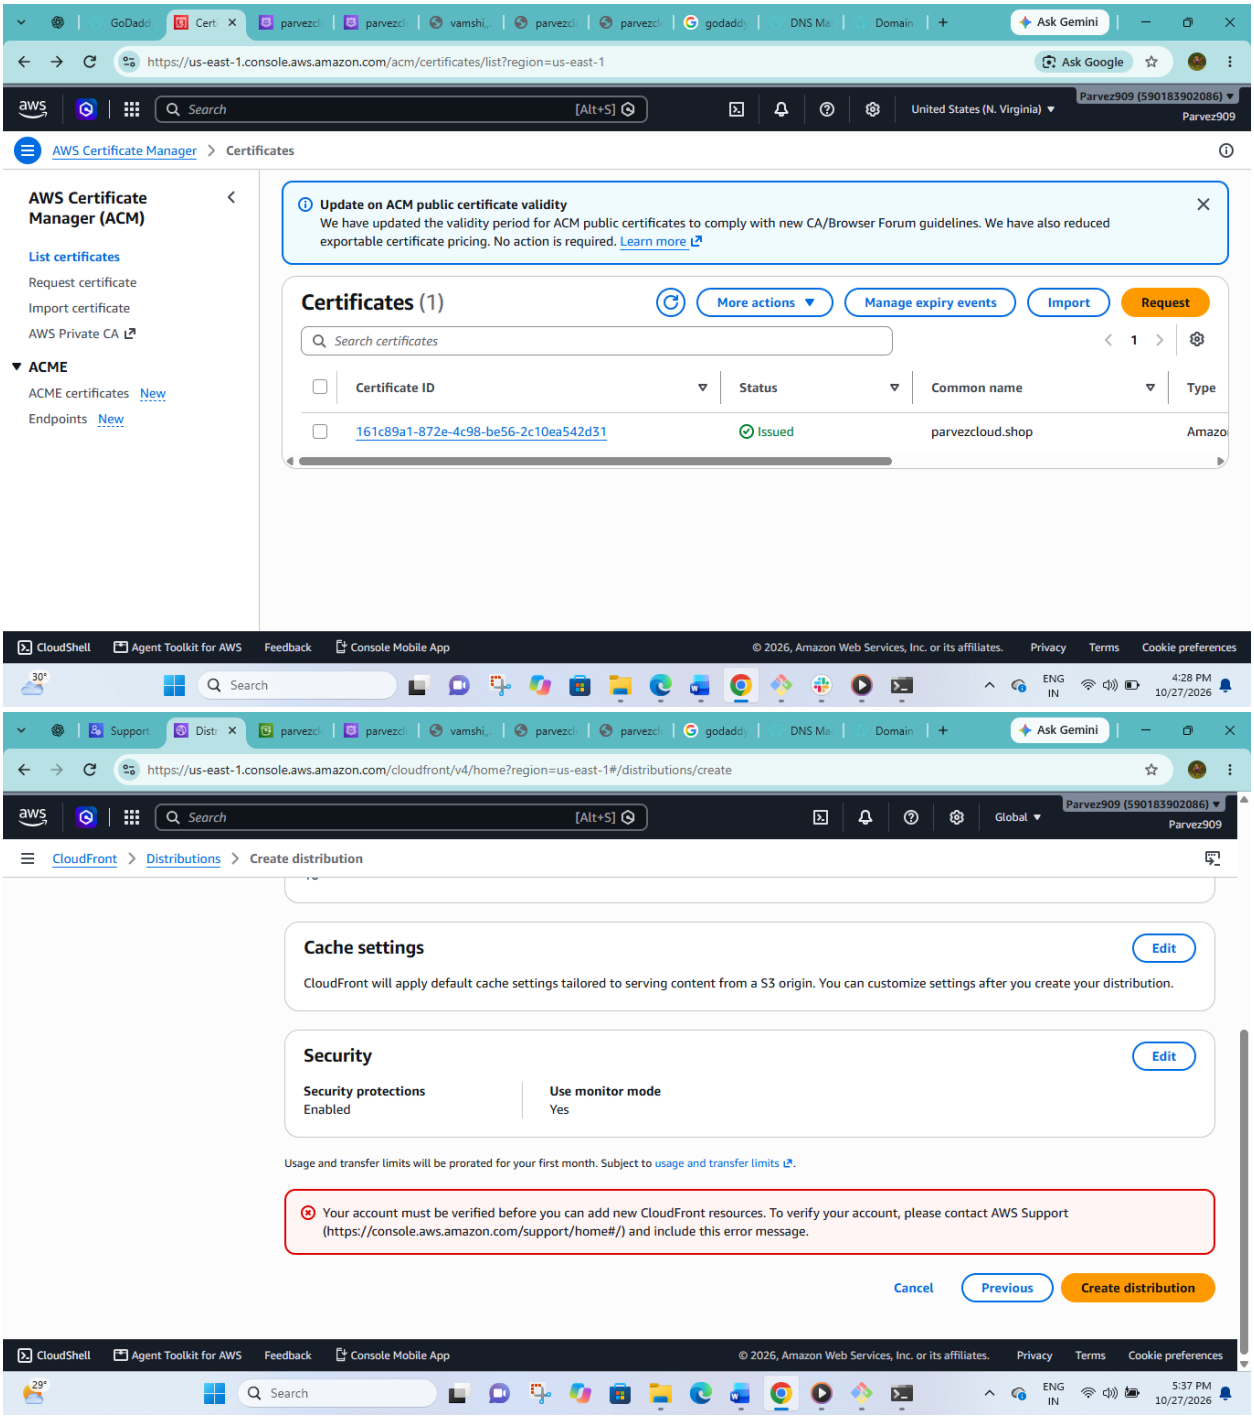

4. Create a CDN and attach one SSL certificate.

.

.

5. **Create a Route 53 hosted zone and map the domain with the CDN.**

6. **Update the index.html in the S3 bucket and ensure the updated file is accessible using the domain name.**

7. **Share the domain name in Slack to test the connectivity.**
