Task on IAM

1. Create one IAM user and assign EC2 and S3 full access roles.

Opened the AWS Management Console.

Navigated to IAM → Users.

Created an IAM user named `myTest-user`.

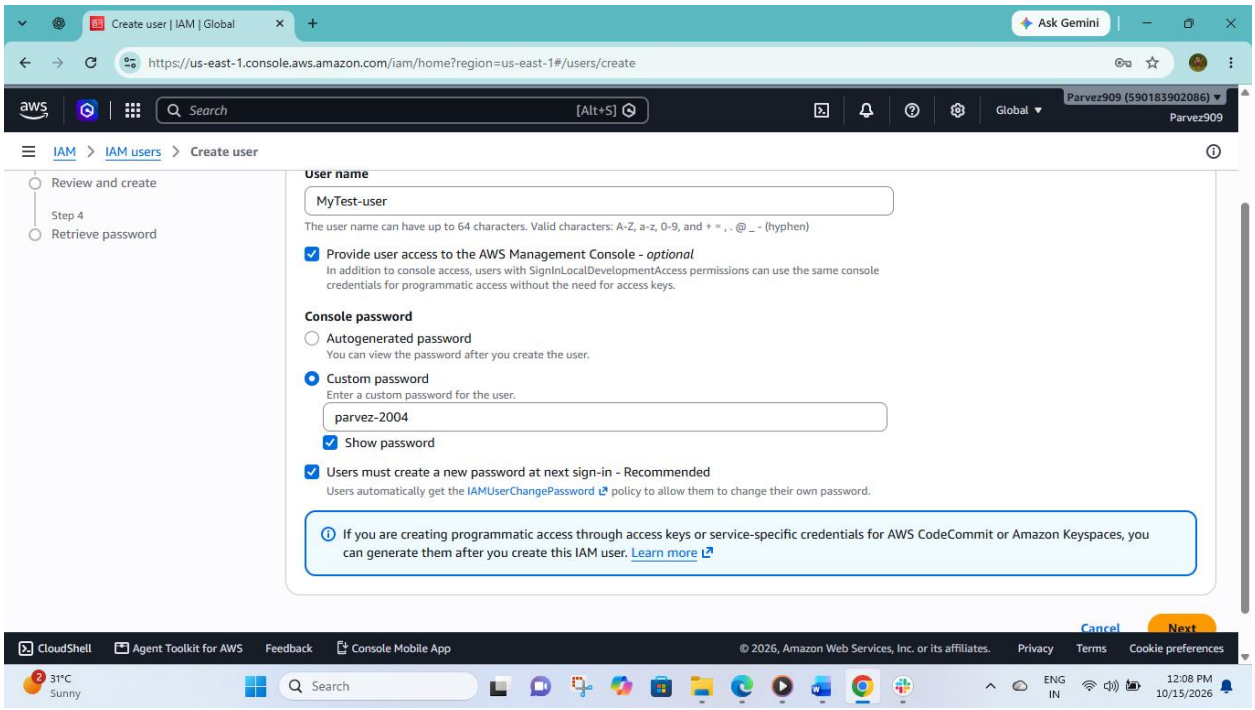

Enabled AWS Management Console access.

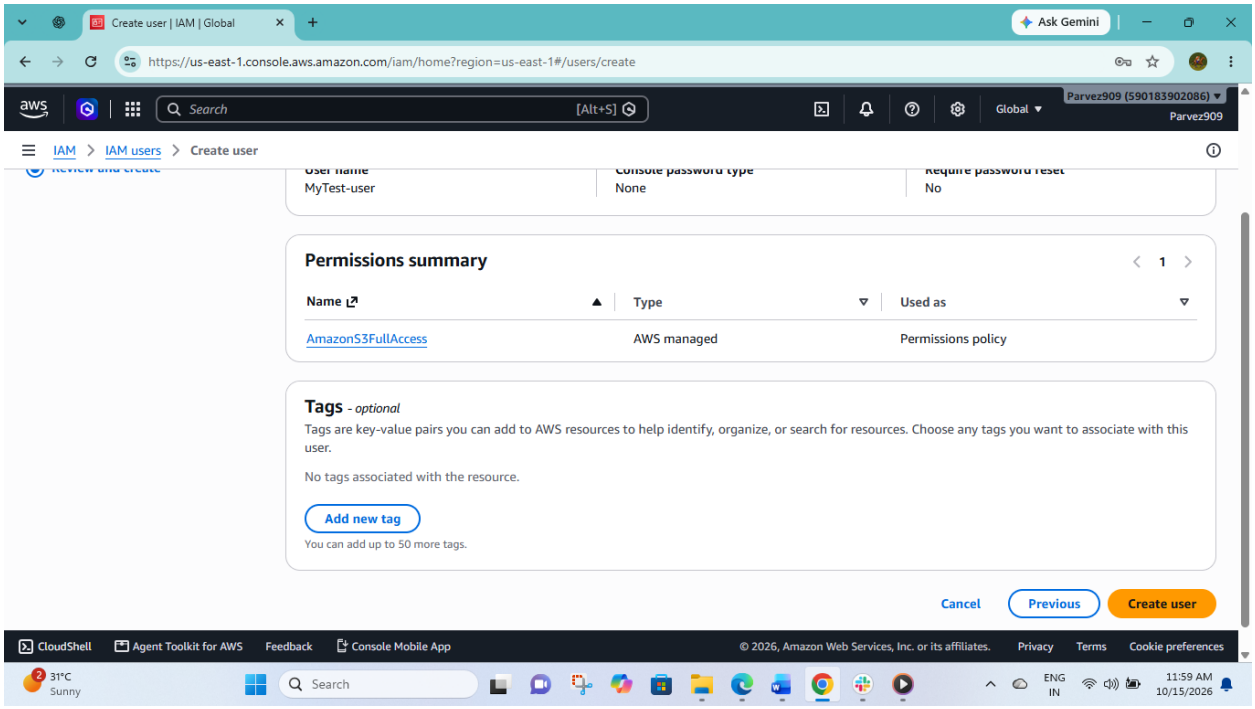

Opened the user's Permissions tab.

Attached the `AmazonEC2FullAccess` policy.

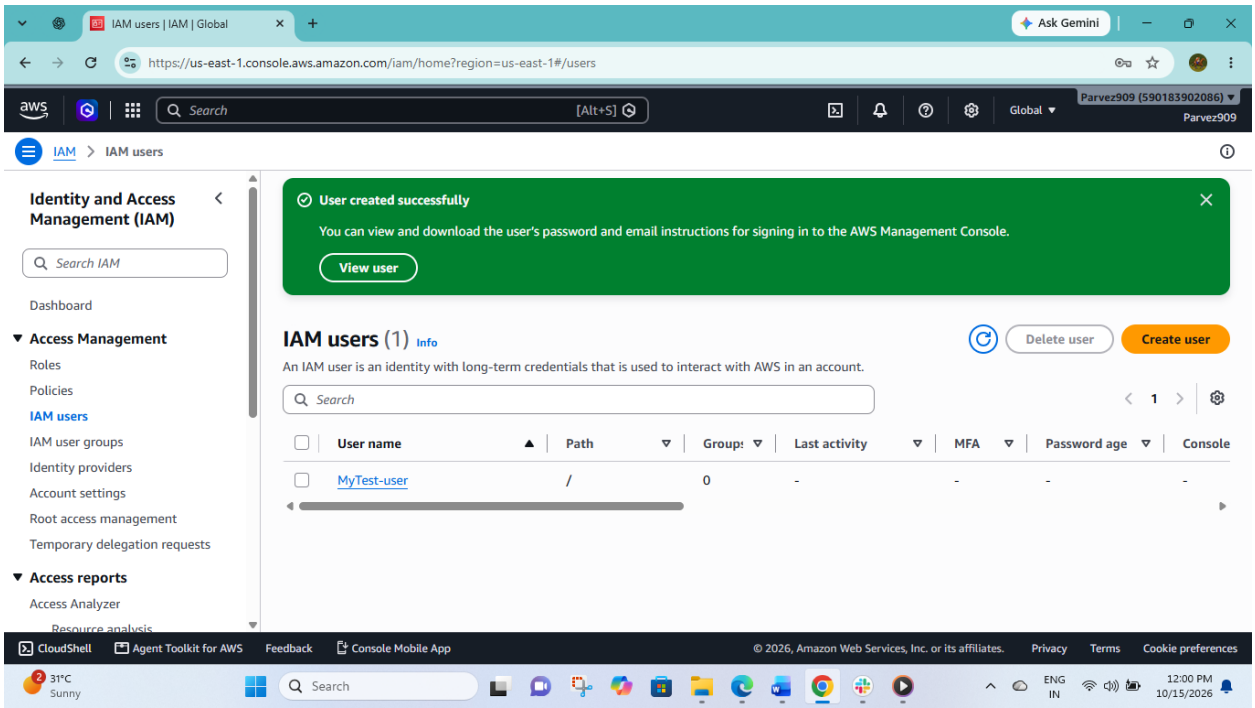

Attached the `AmazonS3FullAccess` policy.

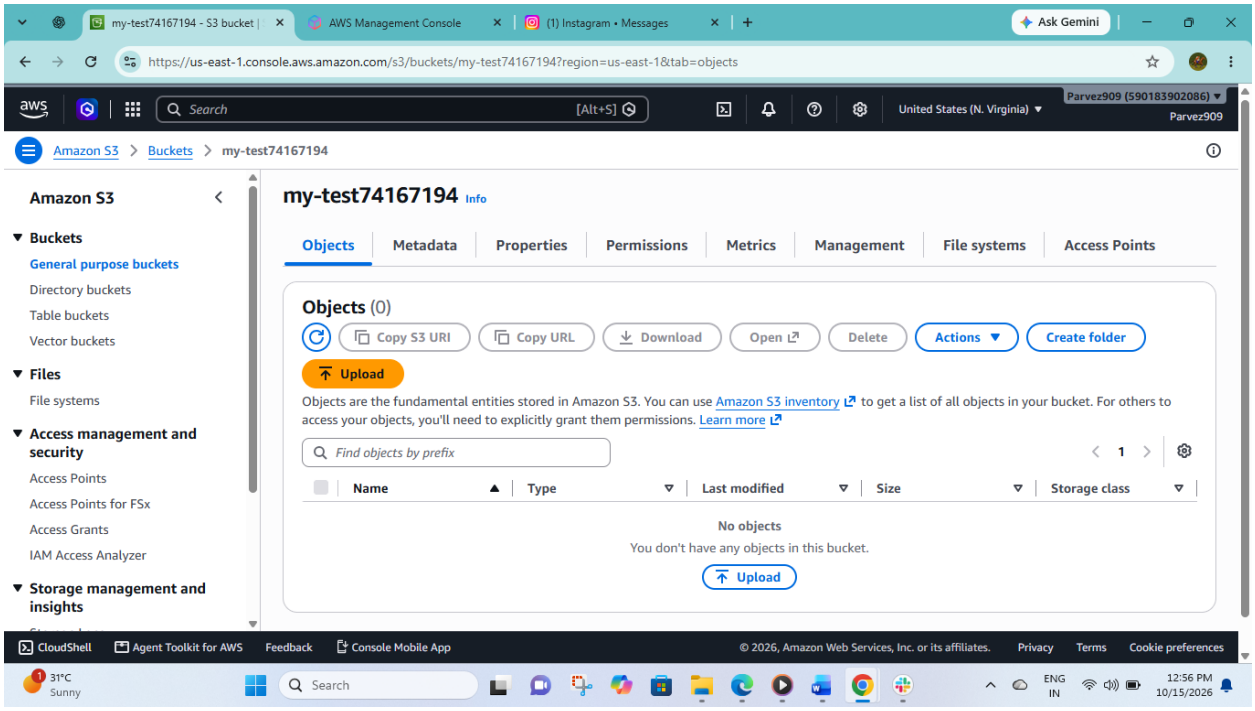

Verified that both policies were attached successfully.

2. Create one group in IAM and assign read access for EC2.

3.Create a new user named "Devops" and add to the group created in task 2.

Enter the username Devops.

. Enable console access and set the password.

. Select Add user to group.

. Choose EC2ReadOnlyGroup.

. Click Create user.

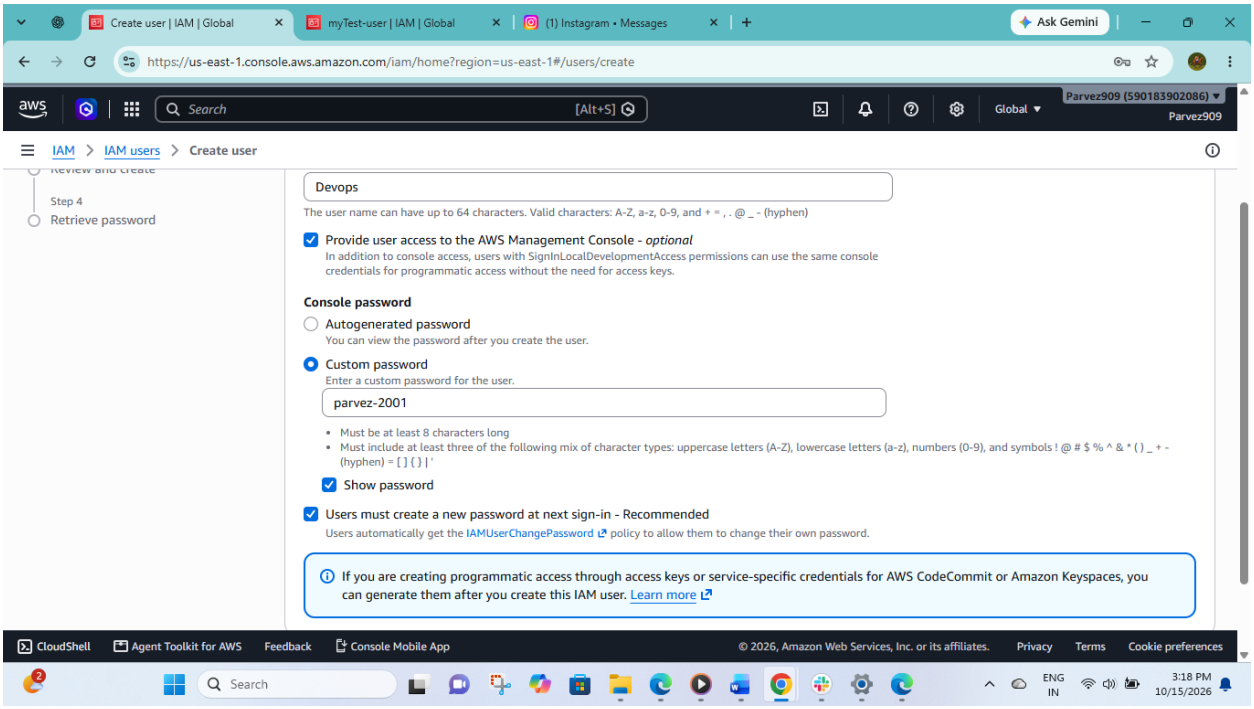

. Verify that Devops is listed under the group's Users tab.

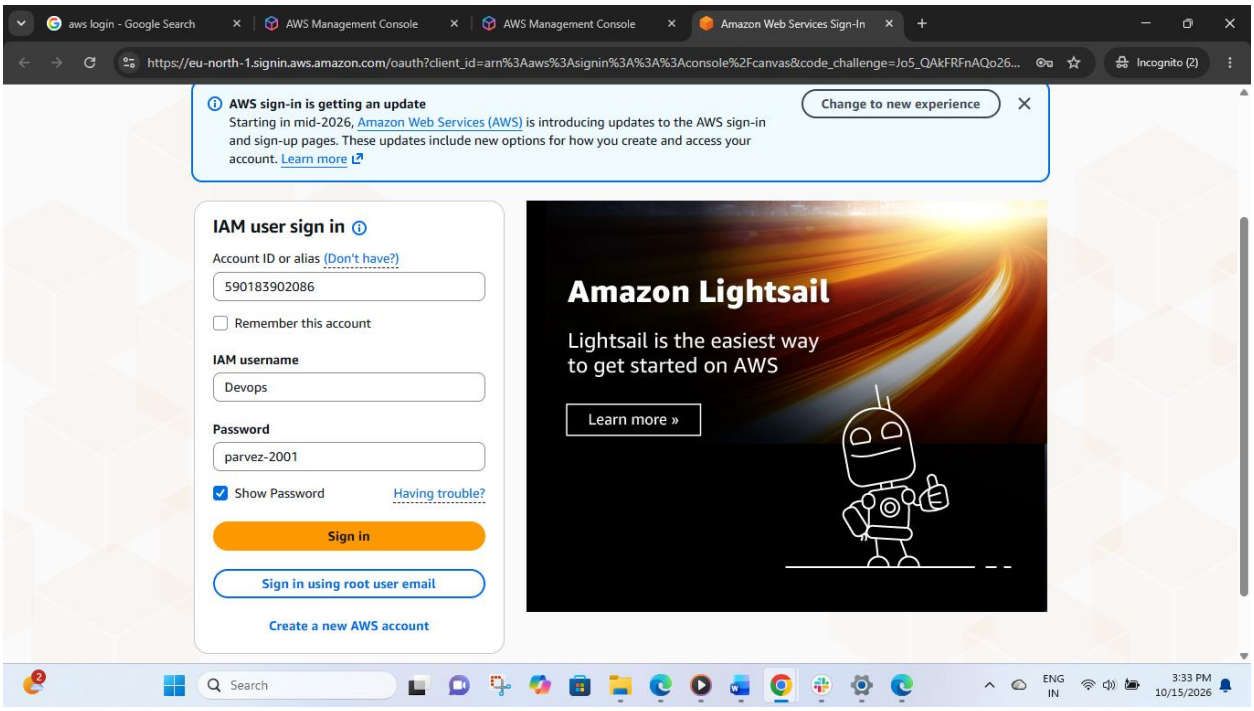

. Verify that AmazonEC2ReadOnlyAccess is attached to the group.

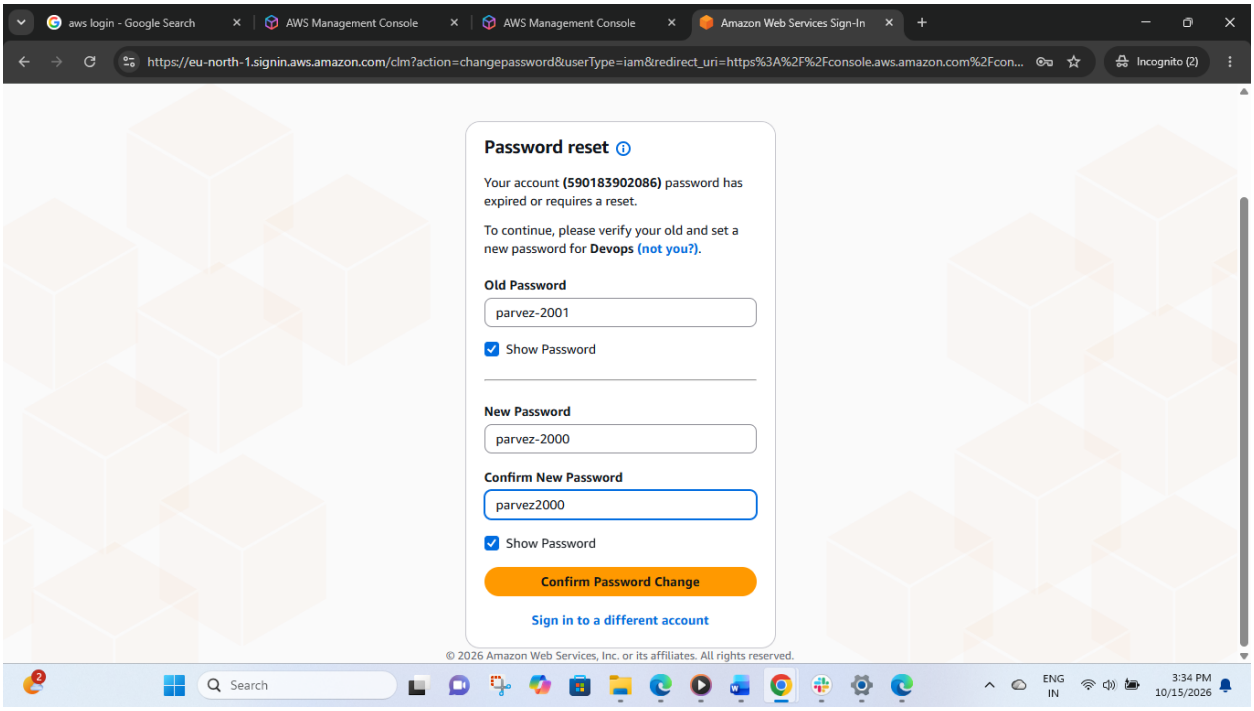

. Sign in as Devops and open EC2 → Instances.

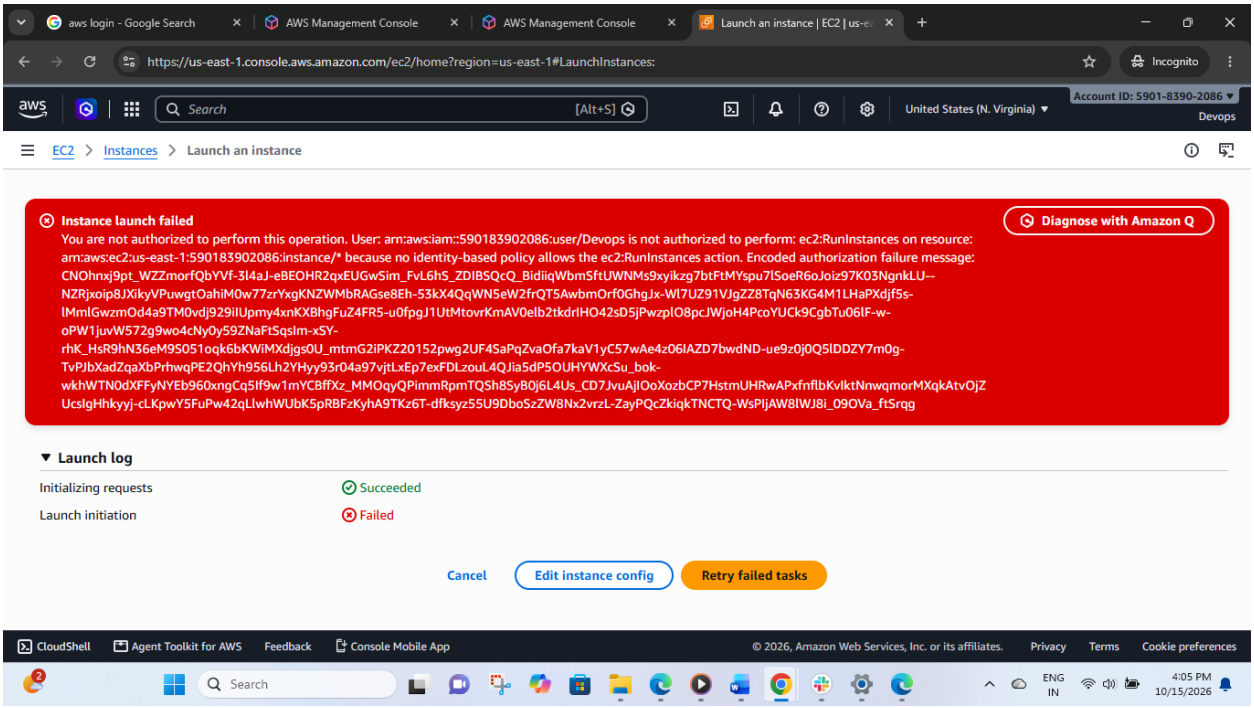

. Verify that Devops can view EC2 instances but cannot modify them if no other policy grants modification permissions.

Task 3 completed successfully.

IAM > IAM users > Create user
Step 4
Retrieve password
Devops
The user name can have up to 64 characters. Valid characters: A-Z, a-z, 0-9, and + = , . @ _ - (hyphen)
Provide user access to the AWS Management Console - optional
In addition to console access, users with SignInLocalDevelopmentAccess permissions can use the same console credentials for programmatic access without the need for access keys.
Console password
Autogenerated password
You can view the password after you create the user.
Custom password
Enter a custom password for the user.
parvez-2001
Must be at least 8 characters long
Must include at least three of the following mix of character types: uppercase letters (A-Z), lowercase letters (a-z), numbers (0-9), and symbols ! @ # $ % ^ & * ( ) _ + - (hyphen) = [ ] { } | '
Show password
Users must create a new password at next sign-in - Recommended
Users automatically get the IAMUserChangePassword policy to allow them to change their own password.
If you are creating programmatic access through access keys or service-specific credentials for AWS CodeCommit or Amazon Keyspaces, you can generate them after you create this IAM user. Learn more
